

Mercedes-Benz engine inside your machine?

For selected models, DEUTZ UK is
now your official aftersales contact.

Since 1 January 2025, DEUTZ UK has been responsible for the service, repair, parts and technical support of selected Daimler Truck Off-Highway engines in the UK.

These engines may carry a Mercedes-Benz, Daimler Truck or MTU designation and are installed in agricultural, construction and specialist off-highway machinery from a range of manufacturers.

Is your engine supported by DEUTZ UK?

Check the engine model rather than relying on the machine manufacturer. Support is determined by the engine fitted to the machine. DEUTZ UK supports the following engine families:

How to check

Locate the identification plate on the engine and look for the model number. Do not rely solely on the machine make or model. The engine model confirms the correct DEUTZ UK support.

Mercedes-Benz / Daimler Truck Engine	MTU reference	DEUTZ reference
OM934	BR1000	T(T)CD 51
OM936	BR1000	T(T)CD 77

Support for your engine wherever it is working

DEUTZ UK provides full aftersales support for the listed Daimler Truck Off-Highway engines through its UK service and parts network.

How DEUTZ UK can help

Service and maintenance

Routine servicing and preventative maintenance to support engine reliability and working life.

Diagnostics and repair

Technical fault diagnosis, on-site repairs, workshop support and expert troubleshooting.

Nationwide engineering support

A UK-wide team of DEUTZ mobile engineers trained to support the listed engine range.

Genuine parts

Access to a comprehensive UK parts inventory of genuine Daimler Truck, Mercedes-Benz and MTU engine parts for the supported range.

Current and Classic engine support

Technical and parts support for selected current engine families and established Classic series.

Before you need support

Locate your engine identification plate and take a clear photograph of it. Save the image with your machine's service records, making sure both the engine model and serial number are both readable.
